Proceeds from this event will benefit the San Diego Chapter of the Huntington's Disease Society of America.

HD is a devastating, hereditary, degenerative brain disorder that results in a loss of cognitive, behavioral, and physical (motor) control and diminishes the affected individual's ability to walk, talk, and reason. The disease can strike at any time in life, but generally adults are affected during the prime of their life between the ages of 30-50, robbing them of their time with family, forcing them out of careers, and leaving them dependent on a caregiver for their basic needs.
